

Dog face keypoints — 46 facial landmarks + 39 body keypoints

The 46 DogFLW facial landmarks, predicted by the face model from a face-filling crop. The 39 body keypoints come from a separate, unmodified SuperAnimal-Quadruped pass over the whole dog.

ear 14 points

- 0 ear_right_inner_base
- 1 ear_left_inner_base
- 2 ear_right_inner_mid
- 3 ear_left_inner_mid
- 4 ear_right_inner_low
- 5 ear_left_inner_low
- 6 ear_right_tip
- 7 ear_left_tip
- 8 ear_right_outer_low
- 9 ear_left_outer_low
- 10 ear_right_outer_mid
- 11 ear_left_outer_mid
- 12 ear_right_outer_base
- 13 ear_left_outer_base

head 2 points

- 14 head_top_right
- 15 head_top_left

no local texture

no local texture

eye 8 points

- 16 eye_right_medial
- 17 eye_left_medial
- 18 eye_right_lateral
- 19 eye_left_lateral
- 20 eye_right_upper_lid
- 21 eye_left_upper_lid
- 22 eye_right_lower_lid
- 23 eye_left_lower_lid

nose 7 points

- 24 nose_bridge
- 25 nose_top
- 26 nostril_right
- 27 nostril_left
- 32 nose_bottom
- 33 nose_right_lower
- 34 nose_left_lower

muzzle 4 points

- 28 muzzle_right_upper
- 29 muzzle_left_upper
- 30 cheek_right
- 31 cheek_left

mouth 11 points

- 35 philtrum
- 36 lip_upper_right
- 37 lip_upper_left
- 38 mouth_center
- 39 mouth_corner_right
- 40 mouth_corner_left
- 41 chin_upper
- 42 chin_bottom
- 43 lip_lower_right
- 44 lip_lower_left
- 45 lip_lower_center

body / skeleton 30 points

SuperAnimal-Quadruped body keypoints:
spine, legs, paws, tail. Not part of the 46
facial landmarks; unchanged by fine-tuning.

Mean face shape over all 4,333 DogFLW images · the animal's right is on the image left

no local texture: the skull crown is plain fur, so a heatmap head - a local detector - has nothing to lock onto. On the previous architecture these two scored PCK@5% 0.6%, i.e. chance, and were computed from the other landmarks instead. That correction is currently OFF and unmeasured on this model.
